Reliance Family Members; Dr. Jon Regis, Lucille Rendina, Grisel Papaccio, Heli Deleon, Souzan Bishara, and Vince Papaccio.

"Your Family Is Our Family" ... this slogan was added to Reliance Medical Group's long-standing motto that "Healthcare is a Right, Not a Privilege" approximately two years ago.

Reliance uses this slogan as a message to our patients to ensure them of our commitment to their overall care. However, during a recent interview, the candidate mentioned that they were seeking a position in a practice where they were able to find their "forever employment opportunity". In other words, the individual was not interested in moving from job to job, but, rather, wanted to find a "forever work family".

The interview discussion emphasized to us that our employees are not only that, but they are our "work family" as well. Although we always say that we are a family, the use of the word "forever" struck a meaningful cord and made us reflect upon its true meaning and definition.

Additionally, we also are aware that Reliance offices that have little to no turnover appear to be the highest performing offices.

There are many contributing factors that create a forever workplace. The following are just some of those factors: including daily leadership by the Site Manager; a regular positive working environment with patients, providers and staff, a cooperative and unified team effort, a clean and organized work space, an adequate office and medical supply inventory, working equipment, and competitive compensation and benefit plans associated with the communities in which we service.

Please be assured that we are both committed to encouraging, supporting, and developing each Reliance office as a "forever" employment site for our staff; and we believe that, in doing so, Reliance will provide a positive and exceptional experience for our patients.

Consequently, the phrase "Your Family Is Our Family" is more than just a slogan to us. Rather, it is a truth and a value in which we believe.

Jon M. Regis, M.D.

" Medical Mondays "
7:30am - 8:30am

Airing on WEHA 88.7/100.3 FM

Streaming Worldwide
www.wehavegospel.com

GOSPEL WEHA 88.7 FM & 100.3 FM

Dr. Jon Regis, President of Reliance Medical Group Host's Medical Mondays on WEHA

Reliance Medical Group is pleased to announce their recent partnership with WEHA 88.7/100.3 FM Inspirational Radio Stations broadcasting throughout Atlantic County New Jersey and worldwide on www.WeHaveGospel.com. Reliance President Dr. Jon Regis and Staff will host a weekly medical talk show to discuss medical issues that affect you, your family and the community at large beginning on Monday, August 19, 2019.

Reliance Medical Group is one of the largest healthcare providers in Atlantic County and has served New Jersey Residents with quality healthcare for the past 35 years. Please tune in to "Medical Mondays" every Monday from 7:30 am to 8:30 am as you prepare for your busy week. It is Reliance Medical Groups goal to address medical concerns that touch upon ALL of your Healthcare needs including Family Medicine, Pediatrics, Women's Healthcare, Geriatrics, Plastic Surgery, ENT, General & Bariatric Surgery, Neurology, Cardiology, and more.

We encourage all Reliance patients, staff and supporters to download the mobile phone WEHA Gospel Application from the Google Play Store and listen to the broadcast online at www.wehavegospel.com. By doing so, you will have the ability to listen to Medical Monday's on the WEHA application if you miss the weekly morning broadcast from 7:30 am - 8:30 am.

UNSUNG HEROES

Reliance's practice at 4401 Ventnor Avenue in Atlantic City has adopted the Atlantic City's Richmond Avenue School which is located only a few blocks away from the practice. Accordingly, Reliance staff have spoken at that school and Reliance has also distributed free backpacks and school supplies to school children in need.

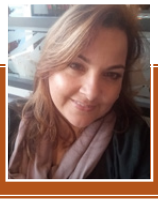
Mary Quantararo
Certified Medical Assistant

Jazmine Segarra
Front Desk

I am honored to have Mary and Jazmine as my staff at the Galloway OB/GYN office. They both are dedicated and very hard workers. I never hear complaint on how difficult or stressful it is, especially when they are short-handed.

It is rare and hard to find staff members that love to work and enjoy coming in and giving our patients the best attention and care.

Dedication like this needs to be recognized.



Carmen M. Ruiz
Practice Office Manager

Michelle Anderson-McFadden
Front Desk

Tamieka Brown
Certified Medical Assistant

Michelle is one of the best front desk employees I've had since working here, beside Tania who now Manages Somers Point location.

Michelle has a sweet demeanor, soft spoken and our patients love the changes that we have made recently.

I also want to announce Tamieka as our Medical Assistant. Tamieka has develop her skills and knowledge to learn the back and to work with Dzmitry, who is our new APN Provider. He enjoys very much working with Tamieka.

I would like to extend my gratitude and appreciation for all their hard work in the Pleasantville office. I can not say thank you enough.

IT'S OWN MULTI-SPECIALTY SERVICES

COSMETIC, PLASTIC & RECONSTRUCTIVE SURGERY / HAND, ENT

HEALTHIER HAPPIER YOU

Dr Ira Trocki Double Boarded in ENT, Plastic and Reconstructive Surgery
Also Specializing in Hand Surgery | Practicing Since 1982

PLASTIC SURGEON

A plastic surgeon is a licensed medical doctor trained in patient interactions, trauma care and basic surgery techniques, as well as specialized areas, such as tissue transfer, body contouring and laser surgery. Plastic and reconstructive surgery deals with the restoration of normal form and function. It is a varied specialty involving adults and children and encompassing a wide range of conditions in different parts of the body.

Plastic surgery is so much more than "cosmetic or aesthetic" surgery. While cosmetic surgery is probably the most visible and perhaps the most glamorous aspect of plastic surgery, it's a relatively small part of the specialty. Plastic surgery may be used not only to enhance a person's looks, but also to restore a patient's appearance following an accident or a bout with cancer or another disease. A plastic surgeon may work on nearly any area of the body, and many specialize in a particular body location, such as the head and neck or hands.

ENT

Did you know that nearly half of patients going to primary care offices have some sort of ear, nose or throat issue?

Think about it. Almost everyone has had a stuffy nose, clogged ears, or sore throat, but ENT specialists treat a diverse range of conditions and disorders of the ears, nose, throat, head, and neck region—from simple to severe, for all persons, at all stages of life.

ENT specialists are not only medical doctors who can treat your sinus headache, your child's swimmer's ear, or your dad's sleep apnea. They are also surgeons who can perform extremely delicate operations to restore hearing of the middle ear, open blocked airways, remove head, neck, and throat cancers, and rebuild these essential structures.

GENERAL SURGERY / BARRIATRIC SURGERY

HEALTHIER HAPPIER YOU

Dr Alexander Knijnikov Board Certified General Surgeon
Fellowship Trained Bariatric, Robotic, and Advanced Laparoscopic Surgeon

Dr. Knijnikov, DO is a graduate of New York College of Osteopathic Medicine and completed his residency at Flushing Hospital in New York City. He completed his fellowship at NYU Winthrop Hospital in Long Island where he trained under some of the greatest pioneers in bariatric and robotic surgery. He also served as an attending surgeon for acute care and trauma surgery there.

After completing his fellowship Dr. Knijnikov was actively recruited to grow a bariatric and robotic surgery program in Chicago. His practice was in an American Society for Metabolic and Bariatric Surgery designated bariatric Center Of Excellence and a da Vinci designated Robotic Epicenter for general surgery, one of only a handful in the country.

Most recently, Dr. Knijnikov was brought on to start a bariatric program at Inspira Woodbury, which he successfully did and the program grew well. He built it from the ground up and served as the Director of the Bariatric Surgery program for several years. Additionally, he actively helped build a brand new robotic surgery program at Woodbury hospital and it has taken off exponentially.

He is also a firm adopter of robotic technology and the multitude of benefits it offers his patients. He offers robotic assisted surgeries such as single incision cholecystectomies, and minimally invasive hernia repairs. His training in advanced laparoscopy and robotic surgery allows his patients to undergo surgery with less pain, a shorter recovery, and overall happier experience.

HEALTHIER HAPPIER YOU

Dr Boris Furman Board Certified Neurologist Providing Consultation and Treatment

Boris Furman, DO graduated from New York College of Osteopathic Medicine/New York Institute of Technology and specializes in Neurology.

He has always wanted to become a doctor since he was in high school. His most important rationale for choosing such noble profession was to help people relieve their suffering caused by medical conditions. In line with his philosophy of care, he hopes to provide the highest quality of neurological care in order to improve the health status and overall well-being of his patients. Dr. Furman has been practicing as a neurologist for more than 10 years. He provides treatment and consultation services for patients who have brain disorders, vertigo, seizure disorders, migraine, epilepsy, dementia, chronic pain, cerebrovascular disease, and other similar conditions.
